

## How do I apply group discounts to my Product?

Last Modified on 12/03/2024 12:18 pm AEDT

As a GameDay Passport administrator, you can define variable prices for your products based on the number of members purchasing it within a single registration. This is most commonly used in a family discount scenario, where the price of a membership product may become gradually cheaper to the registrant depending on how many family members are being registered.

To set up multiple pricing for a product:

1. In the left-hand menu, click **Registrations** > **PRODUCTS**

2. Find the relevant product, then use the magnifying glass icon to **EDIT** the product

### Edit Products - 2022/2023 Age 06 Membership Fee

**IMPORTANT NOTE:** - If you are setting up registration products (such as registration fees) for the upcoming season please be sure to ADD new products RATHER THAN EDITING existing products from a previous season. Editing previous season's products can have serious implications for your transaction reporting, and unexpected consequences for those purchasing products through the form. If you have any doubts about whether you should be adding new products or editing existing ones please refer to [Support Centre - User Guides](#)
