

How do I set a Default Registration Product?

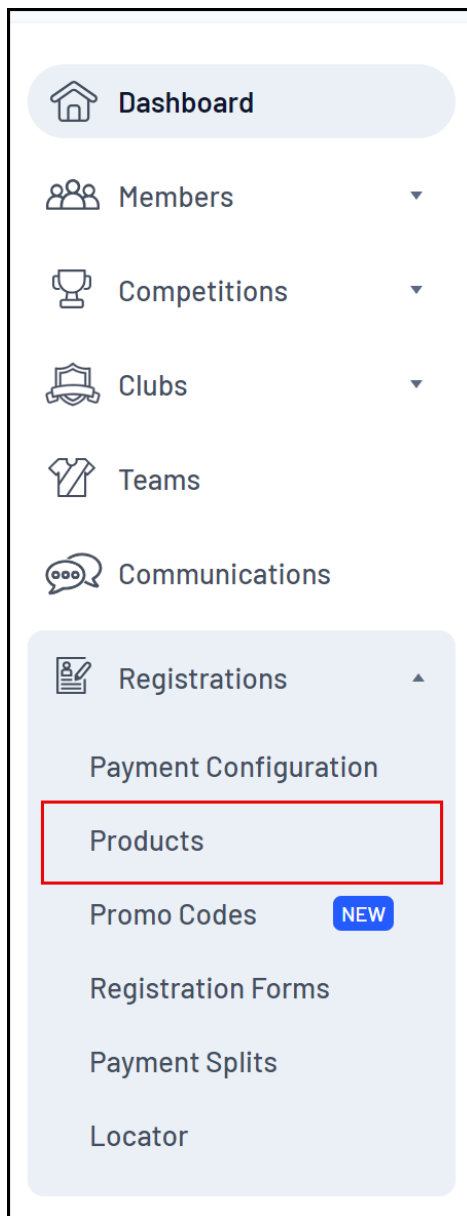

Last Modified on 12/03/2024 12:25 pm AEDT

Association administrators can set a default (compulsory) product for every new member or team that is added to their database or registers for a new season.

Upon creation of a new member or team record, or registration of an existing member or team into a new season, the default product will automatically be assigned.

To set a Default Registration Product:

1. From an Association database, click on **Registrations > PRODUCTS**

2. Scroll down the bottom of the page to the **Default Registration Product** field. There are two

drop-down lists - one for a default **Member** product, and one for a default **Team** product. Select the product that you want to make the default product for new registrations.

	2022/2023 Age 14 Members...	50.00	<input checked="" type="checkbox"/>	Association	100 per cent to Association
	2022/2023 Age 15 Members...	50.00	<input checked="" type="checkbox"/>	Association	100 per cent to Association
	2022/2023 Age 16 Members...	50.00	<input checked="" type="checkbox"/>	Association	100 per cent to Association
	2023/24 Age 14 Membership...	100.00	<input checked="" type="checkbox"/>	Association	100 per cent to Association
