How do I refresh Statistics data in bulk?
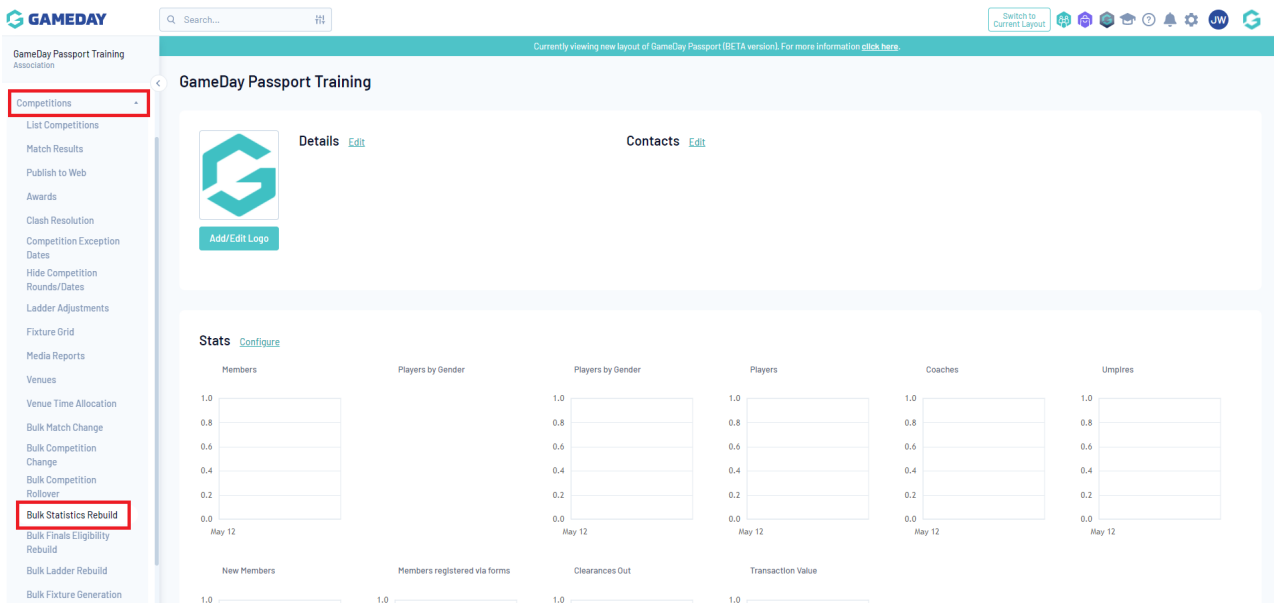

The Bulk Stats Rebuild and Player League Stats menu will give you the functionality to refresh the player stats within your database. This process will only need to be used if the player statistics displaying on your website don't reflect the stats within your database, even after a Publish to Web. The Bulk Stats rebuild can be done by a Competition Season and can be done per particular Competitions. Processing a Publish to Web after completing a Bulk Stats Rebuild should refresh and update the Player Stats data to your website.

Firstly, login to your Online Membership Database - If you don't have your login details please contact your State Governing Body or Association.

The following can only be completed at association level.

1. Click on Competitions and click Bulk Statistics Rebuild.

2. Select the season to rebuild and click Continue.

Bulk Rebuild Player Stats

Select a Competition Season to bulk rebuild Statistics for

Competition Season | 2021 ▼

Continue

3. Ensure the correct competitions are chosen and then click Rebuild Player Stats.

Bulk Rebuild Player Stats

Please select the competitions that you wish to rebuild:
