

Programs | Overview

Last Modified on 12/10/2023 3:06 pm AEDT

GameDay Passport's **Programs** module provides users with the ability to set up multiple registration groupings using the same registration form. For example, a Swimming Lessons registration form can be linked to multiple different lessons, allowing administrators to separate the registration groups for each lesson or time slot.

Programs allows the flexibility to:

- Manage individual participant lists for each program
- Apply one registration form and program template to multiple programs
- Communicate with participants from specific programs
- Apply capacity limits on individual program enrolments
- Report on program enrolment details separate from your membership database

You can find the Programs functionality in the left-hand menu as shown below:

The screenshot displays the GameDay Passport Training Association interface. On the left, a navigation menu lists various sections: Dashboard, Members, Competitions, Clubs, Teams, Communications, Registrations, Programs (highlighted with a red box), Reports, and GameDay View. The 'Programs' section is expanded, showing sub-options for 'Programs' and 'Program Templates List'. The main content area features the organization's logo, contact details for the President (Margaret Bell), Vice President (Barry Driscoll), and Secretary (Barrett Ferguson), and a 'Stats' section with charts for 'Members' and 'Players by Gender'.

The **Programs** functionality can be set up using three key pillars:

Program Registration Forms

A dedicated Registration Form need to be set up to accept Program registrations. This can be done using the **Member to Program** form type when creating a Registration Form.

Program Templates

Allows you to create templated configurations and link your program Registration Form - individual programs can then be linked to these configurations

[Learn more](#)

Programs

Allows you to create individual programs into which members can register

Note: Depending on your sport, you may not have Programs enabled, or program functionality may be restricted to a higher level. If you do not have access to Programs and/or Program Templates, please speak to your governing body or [contact GameDay directly](#).

Programs List

By clicking the **Programs** option, you will access the current list of Programs for your organisation, which includes a range of features:

The screenshot shows the 'Programs' management interface. At the top right, there is an 'ADD' button (1). Below it is a search filter for 'Showing Name Including' (2) and a status filter set to 'Active' (3). The main area contains a table with columns: Program Name (4), Location Name, Start Date, Days Run, Add Products (5), Product Price (6), Participants (7), Registration (8), and Status. The table lists four programs, each with 'Edit Prices', 'View Participants', and 'Register' links, and a status checkmark. At the bottom, there are navigation arrows and a 'Showing all 4 rows' indicator, along with a 'Show: All Auto 25 50 100' dropdown.

1. **Add:** Create a new Program
2. **Search:** Find Programs by name
3. **Status:** Filter the Program List by Program Active/Inactive Status
4. **View/Edit:** View or update a Program's details
5. **Product Prices:** View and edit your organisation's Products
6. **Participants:** View the Program's current list of participants

7. **Registration Link:** Go straight to the front end registration form for the Program

8. **Status Toggle:** Toggle the Program's status between Active (ticked) and Inactive (unticked)

For more information on processes relevant to **Programs**, please refer to the **Related Articles** section of this article.
