

How do I grant Restricted Access to a user?

Last Modified on 09/11/2023 1:14 pm AEDT

When managing access to users in your database you are given the option of restricting their access to only certain functions, as shown in the diagram below.

Restricting access is similar to giving a read-only login and is typically used by clubs to give team managers access to perform functions like team selection, printing team sheets and results entry.

Restricted Access can be granted when adding a new administrator through Passport's [User Management](#) feature:

Grant a user access

To grant access to a user they must hold a confirmed GameDay Passport.

Email Address

Restricted Access

Below is a table defining which functions are available for users with Restricted Access at association and club level:

	RESTRICTED ACCESS (ASSOCIATIONS)	RESTRICTED ACCESS (CLUBS)
