

Team Codes

Last Modified on 22/02/2022 3:46 pm AEDT

What are team codes used for?

Team codes are used for registering players to a certain team via a **member to team form**. When members first access the form they are prompted to enter a team code in order to register.

Sometimes the form may need members to input a team password as well- the association level can access this password or they can be requested when registering the team via a team to association form. If you are a club/team admin, please contact the association to get these team passwords.

Each level (association, club, team) has a different way of finding team codes. Navigate the help centre, to find the process that suits your level.

Across the board, team codes can also be found via the individual team dashboards.

Team codes are automatically generated and are random, you do not have the ability to have specific codes or edit any codes.
