

## Player Statistics Report

Last Modified on 06/10/2022 11:28 am AEDT

### Player Statistics Reprt

If you are wanting to run a report to get specific statistics on players you can run a *player competition statistics* report. If the report is run at **association/league** level it will include all players within all clubs within that specific association/league, and if this run at **club level**, it will only display those statistics for the player within that club in that specific league/association.

If players/admins are wanting to get statistics for players across their whole career (if a player has been in more than one league/club) you will need to contact your relevant state body who will be able to run this report to get an overall view. Information on state contacts can be found here:

<https://support.sportstg.com/help/sport-specific-contact-information>

*Note: the statistics within this report will vary based on each sport, so AFL will have different statistics listed than those within Basketball.*

1. Log into your database
2. Go to **Reports > Competition**
3. Select the **Player Competition Statistics** report
4. Drag accross the generic following fields
  - First Name
  - Last Name
  - Season - you can leave this field blank to get statistics across the whole season or filter this to a specific season - if you wanted to report on the 2020 season you woild filter this field to **EQUALS** and then select the 2020 season.
5. Within the **statistics tab** you have a variety of fields to choose from, so select the statistics that you need. Just click the blue add button against these fields to add them onto the report.

Note: these stats will vary depending on your sport.

**Statistics** ^

+ Games
+ Average Assists
+ Total Field Goals Attempted
+ Total Three Points Attempted
+ Average Free Throws Attempted
+ Average Defensive Rebounds
+ Total Votes
+ Total Minutes
+ Average Turnovers
+ Total Three Points Made

## 6. Run report

Note: if some fields are blank this will mean that your association/sport has not included these in their statistics template, so please contact them directly if you have an questions regarding this.
