How do I find a list of Umpire Codes for the Courtside App?

21/07/2025 4:23 pm AEST

Overview

If referees do not remember their Umpire Codes when confirming games through Courtside, Association/League administrators have the ability to report on the unique codes that referees have for the current season

---

Step-by-Step

Step 1: Navigate to your Reports dashboard

From your Passport Association database, select **REPORTS** in the left-hand menu

Step 2: Run a Season Referee Codes report

In your Reports dashboard, select the **Courtside** category > find the **Season Referee Codes** report > click **RUN**

> **Note:** If you cannot see this report, we will need to enable this for you, so please contact the GameDay support team via email with your organisation/association name and we can get this enabled for you.
>
> This report will run based on the current season your association has set. If no referees codes appear in this report, it means that your association does not have any registered referees for your current season, so you will need to register at least one referee to the current season to be able to see a code here.

Step 3: Use the Umpire Password data to distribute the relevant code to each referee

The Umpire Password column will contain each registered referee's code to confirm their matches in Courtside
