

How do I select players for a Match (Desktop)?

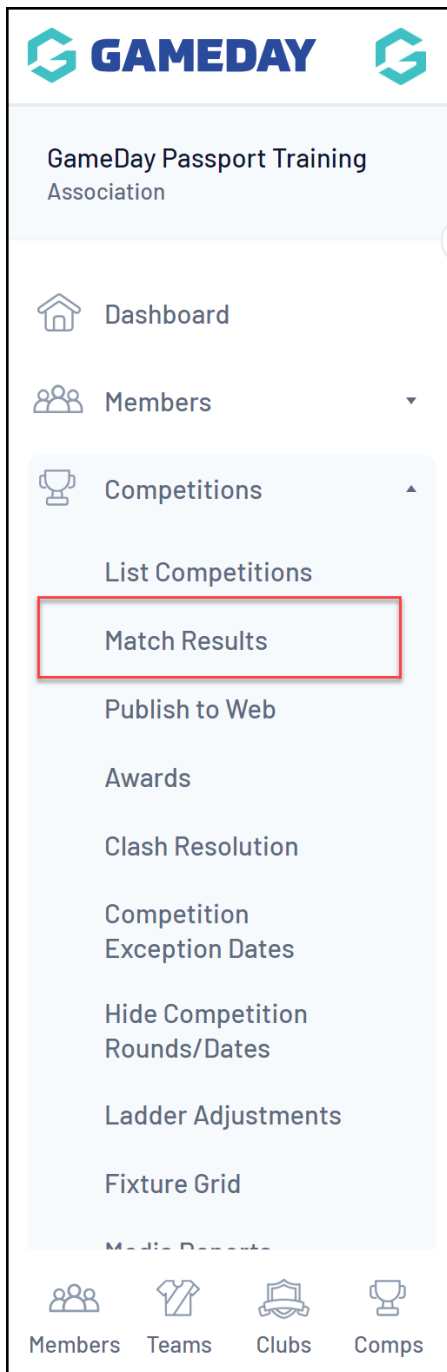

06/10/2025 9:56 am AEDT

Using GameDay Passport's Match Results feature, competition administrators are able to select players for a match from their list of available members.

The **Pre-Game** feature in the Match Results interface allows you to select players for a particular match, who can then be added to team sheets for that match, checked in to mark attendance and have statistics recorded against their account.

To access the Pre-Game feature:

1. From your Passport dashboard, click **Competitions > MATCH RESULTS**

2. Next to a given match, click **PRE GAME**

You can select a variety of filters here to narrow down who appears within this available players list. You can adjust this via clicking the drop down arrow next to the filter icon.

You can select from:

- **Show all Club players**- this will list every player within the club who is registered for the season.
- **Show Players registered to this team only** - this will list the players that have been assigned to this team via the [modify team list](#) functionality.
- **Show Players to this age group**- if your association has a particular age range set for the competition this match, only players that classify within that age range will show.
- **Show all Financial Club players for Competition Season**- displays players that are financial within the season
- **Show all players unassigned** - this will list all the players within your club that are not currently assigned to a team.

You can also use the search option to find a player.

3. To select the player in the match, click the **ADD** icon against their names to assign them to the Selected Players list.

Your browser does not support HTML5 video.

You can also use the **Auto Select Players** option to automatically select players to add to this list rather than having to search and manually add members each time.
