How do I see my schedule in the GameDay App?

21/07/2026 1:54 pm AEST

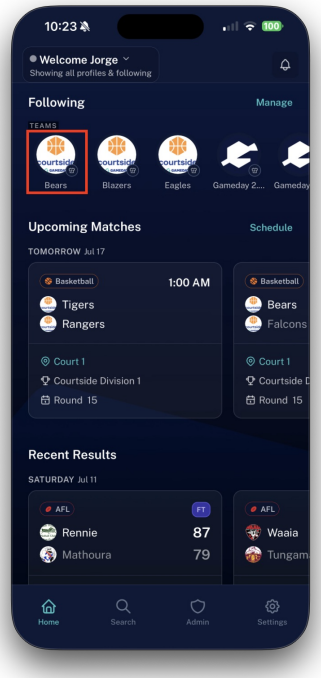

Home Screen

The Home Screen is your default page in the GameDay mobile app. This screen displays a feed of all upcoming matches and recent results for the teams you follow. If you are browsing other areas of the app, you can easily return here by tapping the **Home** icon at the bottom of the screen.

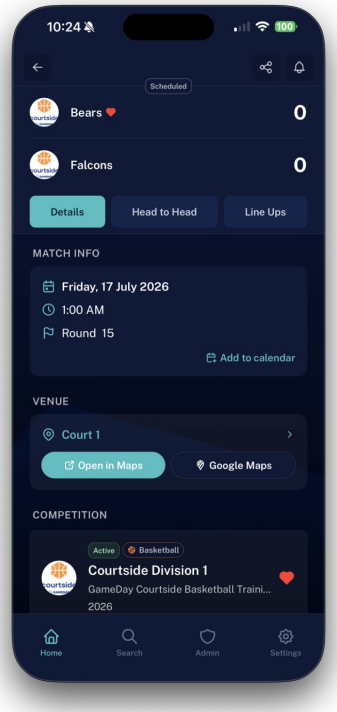

Filter Your View

If you only want to see updates for specific teams, you can filter your feed:

1. Locate the **Following** section at the top of the home page.
2. Tap a specific team's logo to filter the schedule and view only their matches

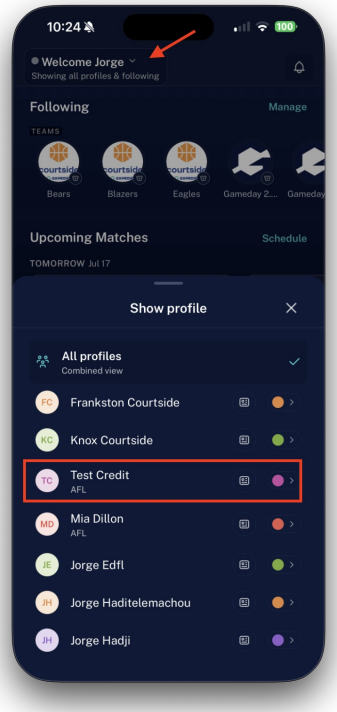

Tapping on each match tile will take you into the Match Centre, where you can view additional information about the match, including venue details, results, stats and ladders. More information related to the match day details can be found here.

Filter by Member Profile

If you have multiple member profiles associated with your account, you can filter your schedule to only display results relevant to a specific member. You can filter these results by clicking on the name in the top left corner of the screen.

By default, the app will display a combined view of all member records.

NOTE: Fixtures will only display here if the association/league has publicly made the fixtures visible. If there is nothing in this schedule, it will mean the league/association has not made these available to the public yet
