How do I navigate the Match Centre in the GameDay App?

16/07/2026 8:28 am AEST

The match centre provides users with a dynamic experience. Prior to the game, the match centre displays information about the upcoming games including map options for directions to the venue. The Summary section provides a full breakdown of the match, including top performers, team and player stats, play-by-play (where available), as well as the competition ladder.

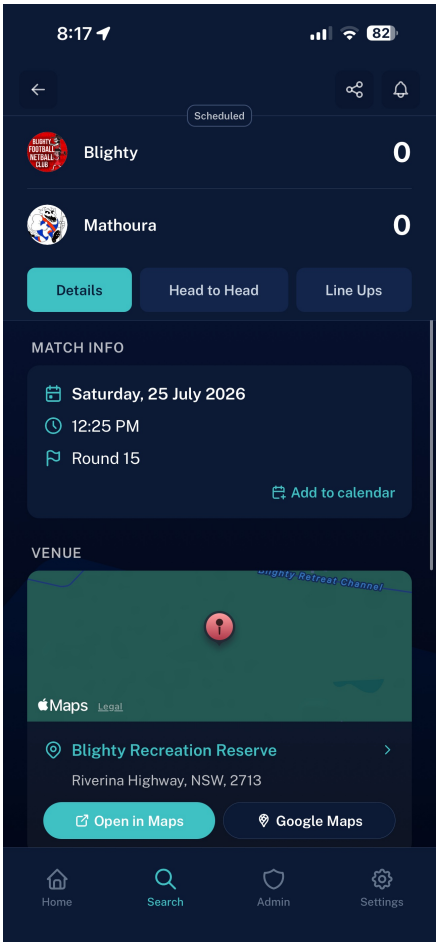

You can access the match centre by clicking into a past or upcoming game within the schedule or team view.

PRE GAME

Prior to the game, you can see details of the match, including teams, time, date and a map of the location of the venue.

Here you can also see a breakdown of the Head to Head results and Team Line Ups.

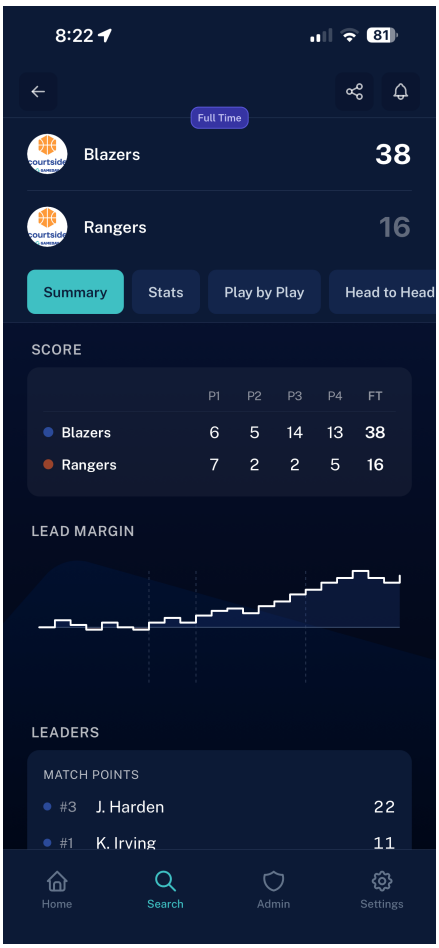

The map location pulls from the address the competition administrators have set for the venue. If this is incorrect, please contact them directly.

POST GAME

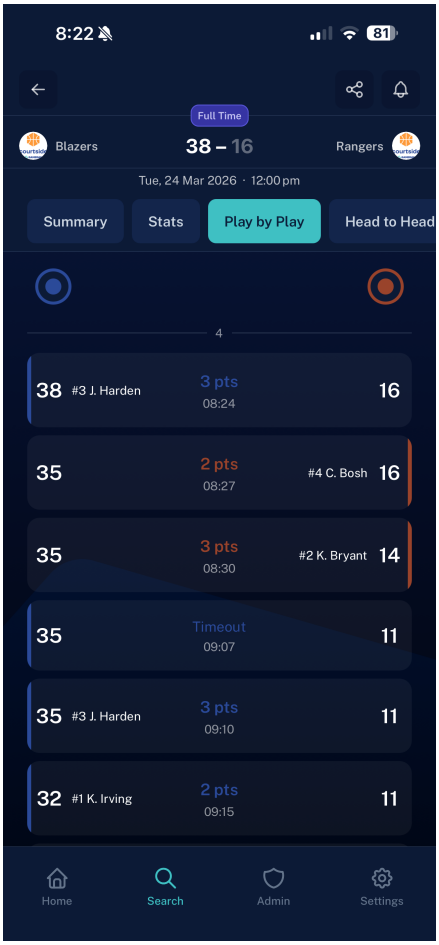

You can view the post-game information of a match that has been played at any time (as long as the administrators have not hidden the match).

After a match has been completed, you can view information from that match from within the **Summary** tab.

Summary tab: the summary tab provides the final scores for the match as well as the top performers (top scorers) for that match (if individual statistics are recorded).

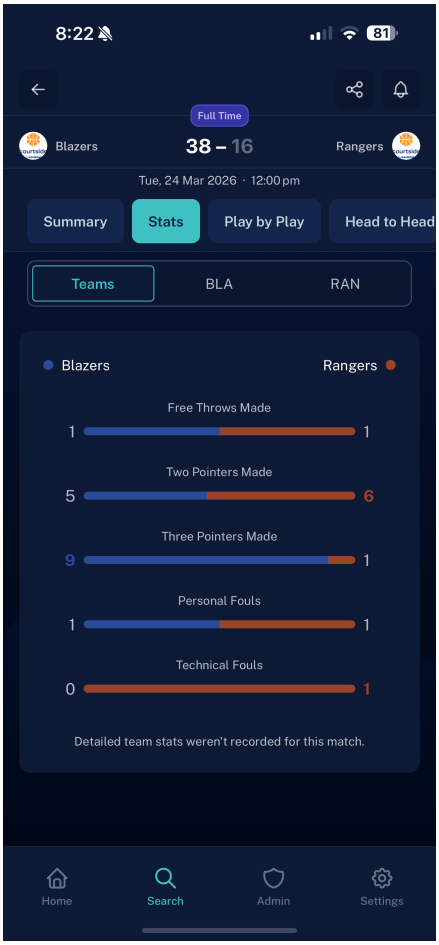

Play by Play tab: this play by play shows when each individual score or statistic was recorded and by which player/team.

Stats tab: this is where individual and team statistics that were recorded throughout the match will display.

Within this tab you can see the team statistics, as well as the individual player statistics for each team (if recorded).

This may be blank if your sport does not record this information.
