

# How do I enable Dark Mode in Match Results on Mobile?

06/10/2025 9:56 am AEDT

GameDay Passport Match Results allows users to view and navigate the interface using **Dark Mode**, allowing users to view the Passport interface through a darker palette to reduce exposure to blue light and screen brightness, extend battery life and provide an alternative design preference for Passport users.

To toggle between Dark Mode and Light Mode in Passport Match Results mobile display:

Click the **DARK MODE** option

The screenshot shows the 'Match Results Entry' mobile interface. At the top left is a green 'G' logo. At the top right is a toggle for 'Dark Mode' with a moon icon and a 'BETA' label, highlighted by a red rectangle. To the right of the toggle is a circular profile icon with the letter 'R'. Below the header is a section titled 'Match Results Entry'. It contains two date pickers: '8/1/2023' and 'To: 16/1/2023'. Below the date pickers is a teal button labeled 'Apply Dates'. Below that is a light blue bar with the text 'Filter Matches' and a filter icon. At the bottom right is a teal button labeled 'Enter Quick Results'.

**NOTE:** You will notice that Dark Mode will display as BETA due to the fact that it is in its initial release phase - this allows for a period of feedback to be provided by users. Users will always be allowed to toggle between Dark Mode and Light Mode.

This will change the theme to Dark Mode, through which the interface is displayed as below:

Light Mode

R

### Match Results Entry

8/1/2023

To: 16/1/2023

Apply Dates

Filter Matches 

Enter Quick Results
