

## How do I reset a match?

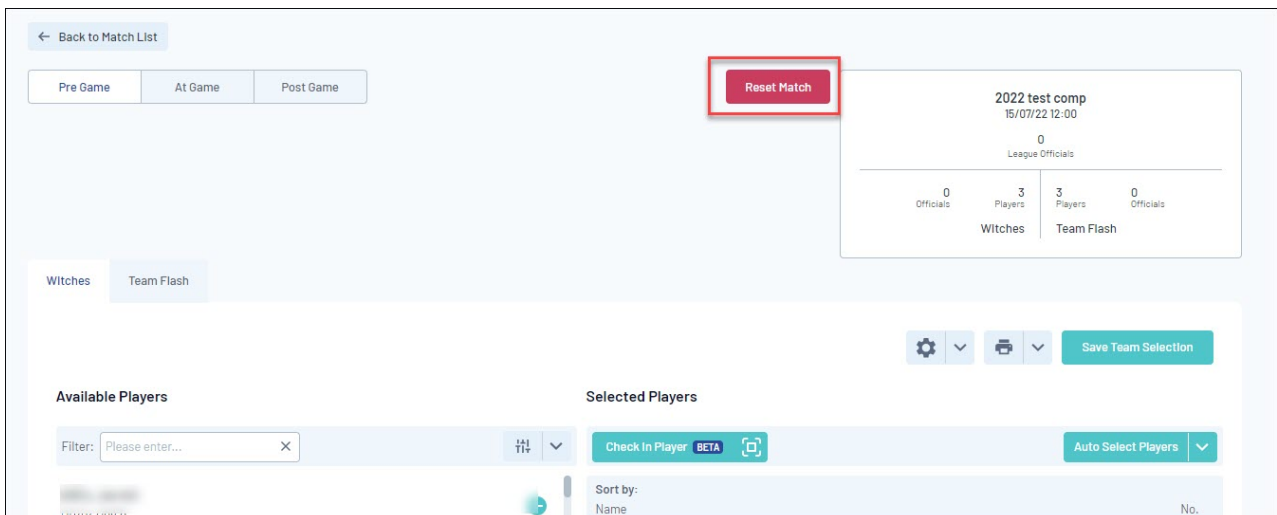

Last Modified on 17/11/2023 12:44 pm AEDT

If you need to reset a match for a particular reason, then you can do so via the following:

**WARNING: By resetting a match it WILL REMOVE ALL DATA of the match including all team lists, statistics and finals results (as well as any livescoring) so if you still need this information before resetting the match, make sure you screenshot the pre-game and post game screens before doing so as once it has been reset, no information can be retrieved.**

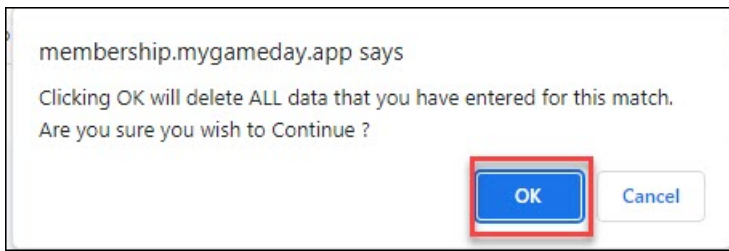

**NOTE: only league/association administrators can reset a match so if you are a club or team please contact your league admins directly.**

1. Go to COMPETITIONS > MATCH RESULTS.
2. Click PRE-GAME against the relevant match.
3. Click the RESET MATCH button.

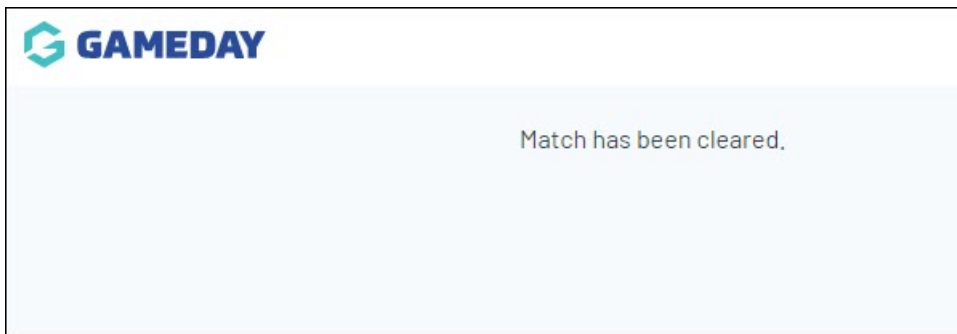

The screenshot shows the GAMEDAY interface for a match. At the top, there is a 'Back to Match List' button. Below it are three tabs: 'Pre Game', 'At Game', and 'Post Game'. A red box highlights the 'Reset Match' button. To the right, there is a match summary for '2022 test comp' on '15/07/22 12:00'. The summary shows '0 League Officials', '0 Officials', '3 Players', and '3 Players' for 'Witches' and 'Team Flash'. Below the match summary, there are two tabs: 'Witches' and 'Team Flash'. A 'Save Team Selection' button is visible. At the bottom, there are sections for 'Available Players' and 'Selected Players'. The 'Available Players' section has a filter input and a 'Check In Player BETA' button. The 'Selected Players' section has a 'Sort by: Name' dropdown and an 'Auto Select Players' dropdown.

4. A confirmation pop up will display to confirm you want to reset this match completely. Click OK.

5. The match will then be cleared - this may take a few seconds depending on how much information was input for this match. Once it has been cleared it will display a relevant message.

6. Exit out of the screen/tab and go back into match results again to re-input results.
