How do I view competition statistics in the GameDay App?

17/01/2024 3:42 pm AEDT

You can view the statistics for your team across the season or the statistics for individual games via the following:

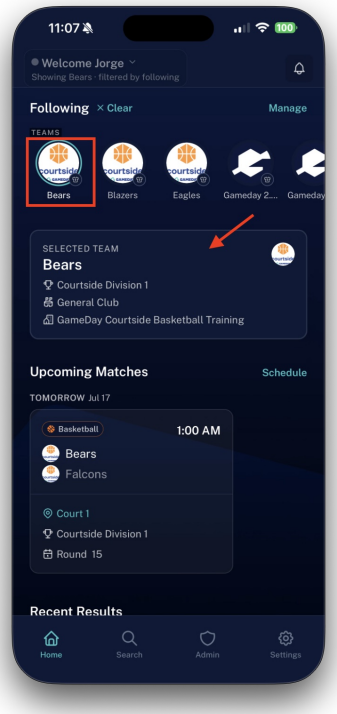

NOTE: Not all sports record individual player statistics throughout the season, so this may be blank.

STATISTICS ACROSS THE SEASON FOR YOUR TEAM:

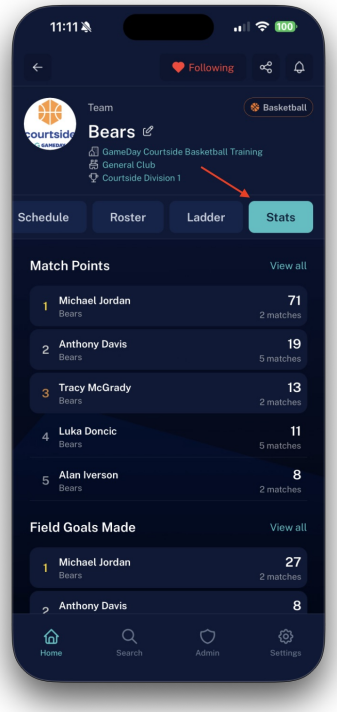

1. From the **Home** screen, click on the **Team** icon.

2. Click on the relevant team from the **Following** section

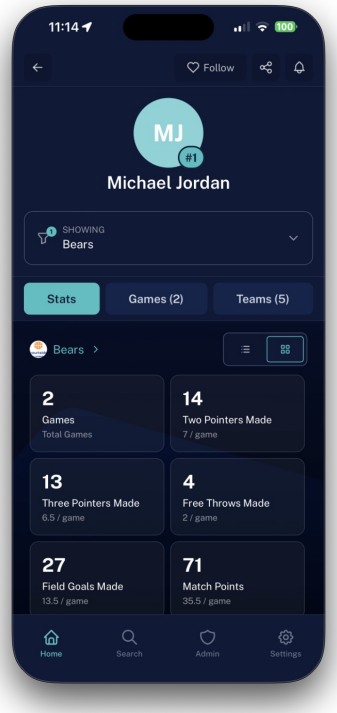

3. Click on the **Selected Team** banner

3. Click on the **STATS** tab.

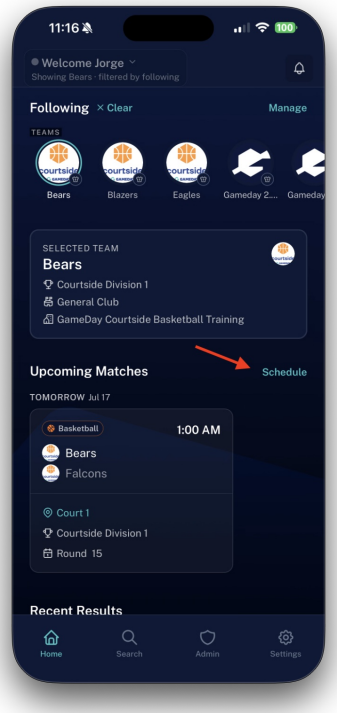

Scroll to find your name within the team list or click **View all** to see a full list of stats for your team. Clicking on a player's name will load a full list of Season Competition **Stats**, **Games**, and related **Teams**.

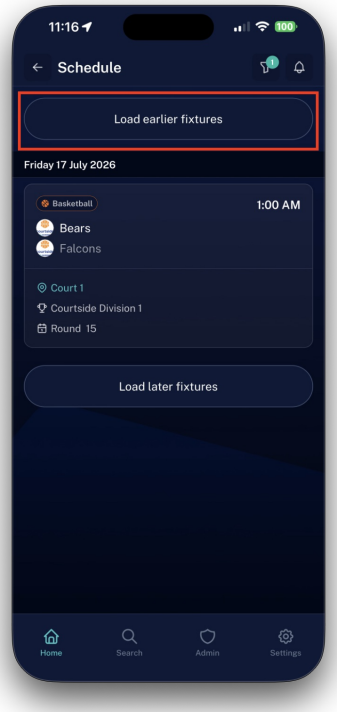

INDIVIDUAL MATCH STATISTICS FOR YOUR TEAM:

These can only be seen for a past match and if the association/league has published these results for the specific match.

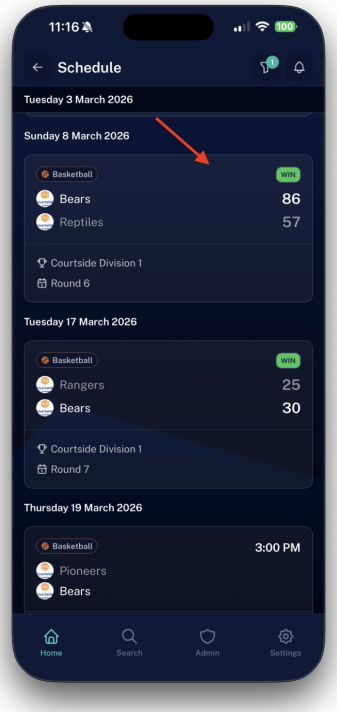

1. From the **Home** page, filter by your favourited team
2. Click on the **Schedule** button

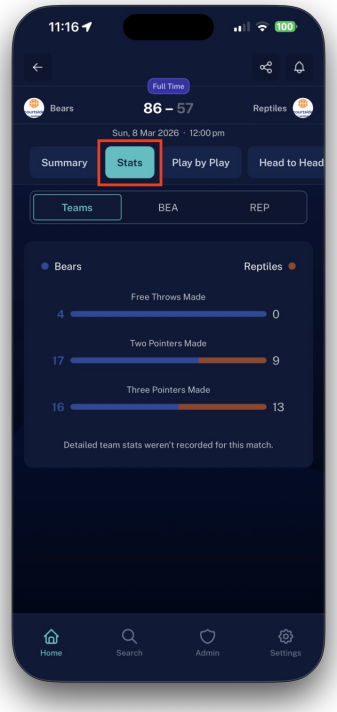

2. Click **Load Earlier Fixtures**

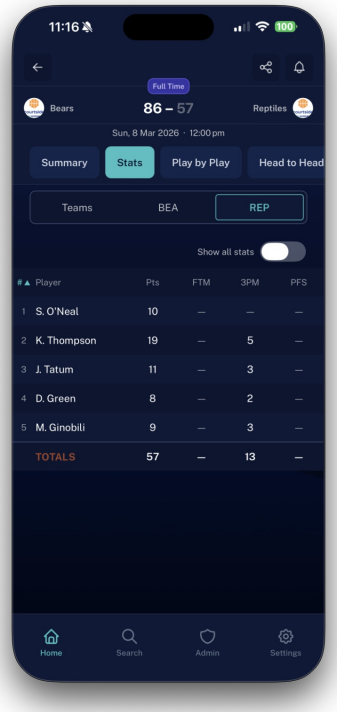

3. Select the match you wish to view

4. Click on the **STATS** tab

5. Click on your team name and scroll to see the statistics for that game.

NOTE: if you find any of these statistics incorrect, please contact your competition administrators directly, as they can check and update these on your behalf
