

Courtside App | Reading an exported game file

08/08/2025 8:33 am AEST

The below provides an outline on how to better read an exported Courtside game file.

The file will be exported into an **xml file** and the following website can be used to display the data in a cleaner and more plain text way.

- You can either upload or copy and paste the data directly.

Website: <https://www.freeformatter.com/xml-formatter.html>

After this has been converted it will display as a long block of text that is formatted into sections.

Below is a breakdown of each section and what it refers to:

The first second provides the following information:

- device information
- courtside version
- competition information (like date, venues and comp name)

```
<?xml version="1.0" encoding="UTF-8"?>
<webcasting>
  <msg typ="data" app="CS" version="5.25.2.205" OS="Android 10">
    <periods per="2" curr="-1" />
    <fouls p="5" t="1" />
    <touts h1="2" h2="2" ot="0" />
    <courting x="5" y="5" />
    <clock time="0:00" p1="0" p2="0" p5="0" p6="0" status="" />
    <gameinfo spectators="0">
      <game no="5" />
      <comp id="5" name="2025 Comp" />
      <sched date="05/08/2025" time="13:00" matchStartTime="1" matchConfirmTime="" />
      <video uuid="" />
      <venue name="Venue 1" court="" oid="198" />
    </gameinfo>
  </msg>
</webcasting>
```

The second set of information is the name of the official(s) that confirmed the game and what code was used.

```
<officials>
  <ref no="1" name="Ferris Douglas" oid="2242" />
  <ref no="2" name="" oid="0" />
  <ref no="3" name="" oid="0" />
  <ref no="4" name="" oid="0" />
  <commish name="" oid="0" />
</officials>
```

Next displays the information related to each player selected within the game for each team

- it only lists their name, date of birth, gender, shirt number

```

<team tno="1" oid="2000000" swcid="2000000" name="Ruzgarli Tepe" short="Ruizgarli Tepe" tcode="" coach="" asst1="" as
forfeitwinner="F" defaultwinner="F">
  <player pno="77" sno="77" fname="Vaughn" sname="Keller" hgt="0" pos="" oid="2000000" swcid="2000000" pid="20" active="1"
suburb="" pcode="" dob="13/09/1988" sex="X" updateteamnumber="1" />
  <player pno="22" sno="22" fname="Ruya" sname="Halact" hgt="0" pos="" oid="2000000" swcid="2000000" pid="21" active="1"
suburb="" pcode="" dob="16/10/2009" sex="X" updateteamnumber="1" />
  <player pno="38" sno="38" fname="Deacon" sname="Garrison" hgt="0" pos="" oid="2000000" swcid="2000000" pid="22" active="1"
suburb="" pcode="" dob="27/01/2007" sex="X" updateteamnumber="1" />
  <player pno="16" sno="6" fname="Ferit" sname="Korhan" hgt="0" pos="" oid="2000000" swcid="2000000" pid="23" active="1"
suburb="" pcode="" dob="12/05/1997" sex="F" updateteamnumber="1" />
  <player pno="2" sno="2" fname="Ferris" sname="Douglas" hgt="0" pos="" oid="2000000" swcid="2000000" pid="24" active="1"
suburb="" pcode="" dob="25/05/2006" sex="X" updateteamnumber="1" />
  <player pno="15" sno="15" fname="Kara" sname="Danvers" hgt="0" pos="" oid="2000000" swcid="2000000" pid="25" active="1"
suburb="" pcode="" dob="14/11/1978" sex="X" updateteamnumber="1" />
  <player pno="5" sno="5" fname="Illana" sname="Hewitt" hgt="0" pos="" oid="2000000" swcid="2000000" pid="26" active="1"
suburb="" pcode="" dob="18/02/1980" sex="F" updateteamnumber="1" />
</team>

```

The last bit is the play by play information for each player in terms what action was assigned to each player (score, foul etc) and team.

```

</playbyplay>
<boxscore>
  <team tno="1">
    <player pno="-1" pid="-1" pts="0">
      <fg m="0" />
      <fg2 m="0" />
      <fg3 m="0" />
      <ft m="0" />
      <fou pf="0" tf="0" uns="0" dq="0" />
    </player>
    <player pno="77" pid="20" pts="0">
      <fg m="0" />
      <fg2 m="0" />
      <fg3 m="0" />
      <ft m="0" />
      <fou pf="0" tf="0" uns="0" dq="0" />
    </player>
    <player pno="22" pid="21" pts="3">
      <fg m="1" />
      <fg2 m="0" />
      <fg3 m="0" />
      <ft m="0" />
      <fou pf="0" tf="0" uns="0" dq="0" />
    </player>
  </team>
</boxscore>

```
