

Share Saved Report to Levels Below

03/03/2026 1:22 pm AEDT

GameDay enables administrators to create customised reports and share them with organisations sitting below them in the hierarchy (for example, State → Region → Association → Club).

This functionality ensures that all subordinate organisations are collecting and submitting data in a consistent and structured format, making high-level reporting more accurate and efficient.

Why Use This Feature?

- Ensure consistent data collection across all levels
- Standardise report formats for compliance and governance
- Improve data accuracy for board, state, or national reporting
- Reduce manual consolidation and formatting work
